When you book a private session at Vivian's Muse, you're getting a lot more than just an average, everyday photo shoot. You're also signing up for a top-to-bottom transformation—a makeover of mind, body, and soul that will leave you feeling soft, strong, and sexier than ever.

Celebrate your inner muse

Every one of our retreats is a celebration of life, love, laughter...this is a place where you're free to explore, have fun, try new styles, and maybe find out a few things about yourself along the way.

Chilled champagne, hot music, lush sets/backdrops, skilled stylists on hand for hair and makeup...our peaceful studio is the perfect setting for you to indulge your fantasies and find your inner muse.

Be cool, be sexy, be silly... just be yourself

Our clients are real women with real lives... and real bodies. Whatever age, race, status, or body type you might have—you are beautiful! There's only one trait that all of our clients share, and that's the desire to open up and see themselves in a whole new light.

High quality products for high quality photographs

We'll do your shoot on Friday or Saturday, give you a peek at your shiny new photographs during happy hour on Sunday, and you'll unwrap your immortalized sexiness very soon after that...whatever presentation you choose, you'll be getting a custom product created from the finest materials, and designed to last forever.

So, what do you want?

Want a custom handmade leather-bound photo album, black & white fine art piece, or a cheeky voyeuristic peep-show package?

You got it.

Want a jolt of irrepressible confidence and a lightning bolt of sensual prowess that will blow your hubby away or make your ex regret ever letting you go?

Done.

Want a series of photos you'll happily show off—on your website, on your book jacket, on social media, or in that forthcoming *Vogue* magazine profile you just *know* they're going to call for any day now?

Let's do it.

Each Private Shoot is a celebratory custom-designed experience, with memories that will last you a lifetime. Because we know you want this memory. We know you want, years from now, to look back and remember this time in your life—and the beauty you've had all along.

Yep. You want it.
